

Title:

Erotic Film Collection

Scope and Content:

The Erotic Film Collection currently consists of two collections, acquired by the archive in 2021. The purpose of this collection is to provide access to the preservation of documents and films regarding peep shows and early erotica. The scope and content of this fonds consists of a large and diverse group of hardcore and softcore pornographic film on 16mm, regular 8mm and super 8 spanning the entire pre-home video era, including various paper documents. This collection includes examples of the major modes of pornographic film production, exhibition and distribution of the era, including legal peepshow films, (originally) illicit stag films, feature length pornographic films shown at grindhouses, and mass-produced, commercially sold 8mm films aimed at the home market.

The evolution of the peepshow format from its softcore roots to (as censorship loosened) a more hardcore mode can be charted through this collection. The evolution of stag films from 35mm professional/semi-professional origination to amateur/prosumer 16mm origination after the debut of the 16mm format can also be charted. The preservation of such a wide swath of pornographic film allows for countless avenues of research into ephemeral, amateur and orphan works that have traditionally been disregarded.

Through the repository, researchers can find various works created by amateur and credited pornographic production companies, spanning various decades. For further inquiries regarding specific collections, please contact archivists for their finding aids.

"Breakdown" is the story of their first "three-way". They were ready, but a third partner was hard to find in the small farming community. Rob Carter, a traveling salesman, lost on the country backroads, spots the two named horseback riders. Knowing what he wants, Rob soon devises a scheme to attract their attention. He opens the hood of his car and disconnects the radiator hose, causing billows of steam, which soon has our lovers colunteering help to this cunning "hapless" motorist. Jack and Scott are immediately turned on to Rob. Suit, tie, vest, pants, quickly disappear as this oversexed trio begin to explore each others right hard bodies. Immediately the three are engaged in a suck fuck fest that knows no bounds, three hot mouths and three rigid cocks ready for any action.	Description of film length from box: 41.9 meters

Title:

Albert Steg Collection

Overview:

The Albert Steg Collection is a fonds which consists of two series, further divided into five sub-series as part of the larger Erotic Film Collection. This collection was processed by the archive as a donation by Albert Steg in 2021, who is a film archivist based in Massachusetts. Steg built the collection over the past 30 years, collecting reels mainly from eBay.

The first series consists of celluloid films on cores, stored in archival cans and boxes. This series is further divided into sub-series based on gauge format. The films arrived at the Mark S. Bonham Centre for Sexual Diversity Studies in archival cans (16mm) and boxes (8mm) with Steg's original labels affixed to the canisters. These labels feature the film's title, a freeze frame from the film, and the donor's original accession number. On the 8mm films, Steg included pithy and personal reviews of the film's content and performers. For the sake of continuity and the integration of the items into the broader Erotic Film Collection, the previous item numbers on the 16mm canisters have been preserved (e.g. A-0463), but new accession numbers specific to the SRC have been assigned (e.g. STEG.2022.04.260).

The second series consists of paper materials, and is further divided into four sub-series. The first sub-series consists of promotional film pamphlets. These items provide descriptions and still images of various films and series by pornographic producers of the collection's time period. The second sub-series consists of print books regarding the film history of pornography and various aspects of pornographic film production. The fourth sub-series consists of playing cards; there was no information regarding the provenance of these items from the original donor. The fifth sub-series consists of assorted print material, stored in their original boxes. The first box consists of personal and acquired mailing material; for access to these items, further inquiries should be made to the archivists. The second box consists of peepshow cards, there is no information regarding the provenance or intended use of these cards, and so further research is required.

The Sexual Representation Collection is also home to Steg's FileMaker Pro database. This database is itself an archival and historical object specific to Albert Steg's history as an erotic film collector and reseller. Going beyond listing just the physical items donated to the SRC, this database lists every item Albert Steg ever bought and/or resold, along with purchase prices, resale prices, and miscellaneous notes related to each item. The information contained within this database requires further verification and corroboration.
